I don't know how to launch Liquid Notes.

Last Updated: Jun 03, 2014 11:21PM CEST

This article talks about launching Liquid Notes after the installation is complete.

Quick Answer: Liquid Notes is installed as a separate application outside of the DAW. Find it in your application folder / launchpad (Mac) or program directory / start menu (Win).

Launching Liquid Notes after installation

Liquid Notes is not available as a VST, AU or AAX plugin. Hence, the installation routine of Liquid Notes installs the application into your machine's regular application directory - consequently, the application is not to be found within a DAW's plugin directory or similar. Instead, it is located in your application folder / launchpad on Mac or program directory / start menu on Windows.

To start Liquid Notes, go to the launchpad or start menu of your machine and select *Liquid Notes* or *Liquid Notes for Live* from there.
